

OAKHILL ENVIRONMENTAL INC.

ENVIRONMENTAL MANAGEMENT SYSTEMS – ISO 14000

Applicable Standard:

International Organization for
Standardization
ISO 14001:2004

ISO 14000 is a series of standards regarding Environmental Management. ISO 14001 (under ISO 14000) deals specifically with requirements for Environmental Management System (EMS). These standards are set out by the International Organization for Standardization.

ISO 14001 is a certification for an EMS to improve environmental performance and objectives in the manufacturing industries. A major benefit to manufactures is that it will assist them with marketing their products internationally.

How Oakhill Can Help:

Oakhill can assist in the creation of an EMS and the certification process for ISO 14001. If an EMS is already in place, Oakhill will determine what needs to be done to meet ISO standards. Oakhill is committed to finding solutions that will best suit the client's requirements.

Tasks typically include:

- Define and develop an environmental policy;
- Design a plan with objectives and targets to fulfill the environmental policy;
- Ensure management and employee commitment to continual environmental improvement;
- Measure, monitor and evaluate environmental policy objectives and targets; and
- Review and continually improve the EMS.

Call Oakhill for a free no obligation quote, which will define in detail the tasks required to make your facility compliant.
