

## ASBESTOS COMPLIANCE ASSESSMENT

### Applicable legislations:

Occupational Health and Safety Act

O. Reg. 278/05 - Asbestos on Construction Projects and in Building and Repair Operations)

Facilities constructed in the province of Ontario may have liability concerns regarding the presence of asbestos in the workplace. The current regulation includes strict provisions for dealing with asbestos and the management program building owners and employers must have in place. Provisions in the current regulation may put many businesses in a state of non-compliance.

Are you sure that your company is in compliance with current provisions?

Compliance Issues	Yes/No
Are you aware of any Asbestos in the workplace?	
Is there any planned demolition or restoration work?	
Does the workplace provide Awareness Training to workers?	
Does the building have an ACM survey?	
Does the survey offer the following?	
- ACM Location?	
- ACM Condition?	
- Friable or non-friable?	
- Asbestos type?	
- Has the report been updated in the last 12 months?	
- Is the ACM being inspected at reasonable intervals?	
- Have the workers/employees had written notice?	

### ***How Oakhill Can Help:***

Oakhill will assist you by conducting a FREE initial meeting to discuss your specific individual needs. During this meeting we will review any of your existing policies, reports and/or surveys. After a walk-through of your facility to better understand your situation Oakhill will provide your facility with a course of action to help you “Bridge the Gap to Compliance.”

Contact Oakhill for a FREE quote. Avoid work stoppages and fines over issues of non-compliance.
